

## Hamмам Table oval – Relaxation by means of ceramic radiant Heat

The gentle ceramic radiant heat and treatments of a traditional Hammam foster the deep relaxation. With the new Hammam table oval, the Ceramics Manufactory Sommerhuber reinterprets the classic applications and creates velvety-soft lying surfaces in single rooms.

An unparalleled relaxation – an individual oriental experience of well-being, this is made possible by the Hammam oval by Sommerhuber. By means of the long-wave health-enhancing infrared radiation, the velvety-soft heat storing ceramics has a soothing effect on the autonomic nervous system and thus enhances the vitality and vigor. The gentle radiant heat boosts the circulation, dissolves muscle tensions and provides for an intact immune system.

In order to meet the highest hygiene requirements, we process large-area ceramics with as few joints as possible which have always been a potential weak point in terms of hygiene in every wet room. Elegantly proportioned water basins in one piece – a must in every Hammam – round off the esthetic design vocabulary.

The Hammam oval, the niches and water basins are available in 22 different glazes and are produced according to the customers' individual requirements. An exquisite experience of enjoyment which perfectly combines design and sensuousness. For detailed information, please see [www.sommerhuber.com](http://www.sommerhuber.com).
