

Healing Clay Spa - Ceremony for Body and Soul

With the unique design of Healing Clay Spa, Sommerhuber has created a one-of-a-kind wellness oasis for spa areas.

Radiant ceramic heat and velvety hygienic surfaces ensure optimal seating comfort and relaxation. Whether Healing Clay Steam Bath is used by two people or by four, it's always a ceremony for body and soul. Therapeutic healing mud or foam cleanse and nurture the skin, purify the body and stimulate the metabolism. This unique effect is brought about by the combination of healing clay and steam bath.

The ergonomic shape of the Healing Clay Spa seats allows the entire body to nestle into the warm, velvety ceramic seat and take full advantage of the gentle, radiant ceramic heat. Experience the incomparable radiant ceramic heat of the Sommerhuber Healing Clay Spa. The heat-storage ceramic gives off long-wave, health-promoting infrared heat, has a calming influence on the vegetative nervous system and provides for optimal relaxation.

To meet the highest standards of hygiene, only large-scale ceramics are used to minimise the number of seals, which might be a hygienic weak point in damp areas. Mud and water run off easily towards the front from the mud drain into the central drain.

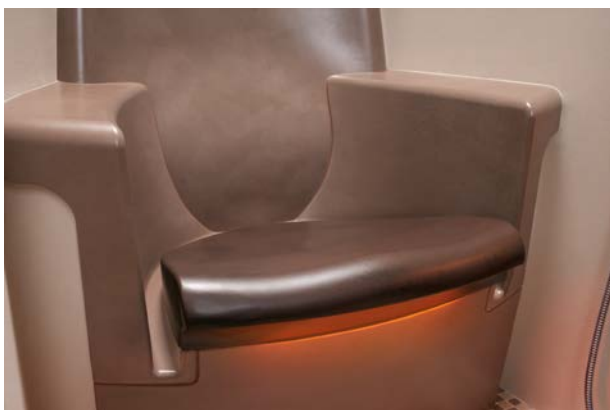

The Sommerhuber Healing Clay Spa is available in 22 different glazes, can be implemented in different sizes and is installed by an experienced wellness specialist. Interested readers can obtain more information by calling +43/7252/893-0, at www.sommerhuber.com or at keramik@sommerhuber.com
