

HOME SPA CUBIC STYLE - WELLNESS HOLIDAY AT HOME

Enjoy the mild ceramic radiant heat and re-energize. This is the idea behind the Home Spa rooms of the Keramik Manufaktur Sommerhuber. These multi-functional Home Spas may be used in a variety of ways: as a steam bath, as a tepidarium and/or with sole, light or aroma therapies – Home Spa offers a range of usages in a single room.

Carefully thought through and coordinated with the available space, Home Spa is an oasis of well-being right in your own home or in hotel suites.

The high-quality Sommerhuber heat-storing ceramics transmit heat to the body in the form of mild ceramic radiant heat. The mild long-wave infrared radiant heat is stress-relieving to the autonomic nervous system, promotes blood circulation, relieves muscular tension and positively influences the immune system.

The clean design of the Home Spa Cubic Style and the unique free-floating seating with a width of up to 1.4 m makes the Home Spa Cubic Style a real visual highlight. If the backrest is made of corrugated ceramic, the Home Spa appears particularly elegant. Home Spa is available in nineteen different glazes.

The seating is electrically heated whereas water heating is also available for walls and backrest. The temperature is continuously variable so that the temperature felt as ideal by a person can be individually set.

Hygiene plays a dominant role in the Home Spa Cubic Style. Due to the large-scale tiles only very few seams are necessary which in turn has a positive effect on hygiene and visual appearance.
