

Lounger Two Plus – the perfect Relaxation

The gentle ceramic radiant heat excels due to its unique beneficial effect for our well-being in the gentle, long-wave infrared range. The Ceramics Manufactory Sommerhuber has been living and creating this health-enhancing benefit for generations. The new free-standing Lounger Two Plus, an advancement of the Lounger Two levitating on the wall, provides for a perfect relaxation with its clear and reduced design vocabulary and its ergonomic, velvety-soft surfaces.

An unparalleled comfort – the special kind of experience of well-being, this is made possible by the new Lounger Two Plus by Sommerhuber. The ergonomically designed surface perfectly envelopes the body. Via the autonomic nervous system, the gentle radiant heat of the ceramics has a soothing effect, boosts the circulation, dissolves muscle tensions and has a positive effect on the immune system.

Relaxation and Design perfectly presented

The Sommerhuber heat storing ceramics does not only excel by its esthetics and hygiene but it also supports the vitality and vigor due to the healthy heat radiation. The electrically heated seating surface with its discrete socket is available in 22 contemporary glazes. An experience of enjoyment which perfectly combines design and sensuousness.
