

## **Lounger One Plus – ultimate relaxation**

**Top notch relaxation – the new ceramic heated Lounger One Plus by Ceramics Manufactory Sommerhuber is characterized by an organic aesthetic, delicate contours and an ideal lying comfort. Comfortable ergonomically shaped Heat Storing Ceramics nestle the skin and provide for perfect relaxation – touchless enjoyment meeting the highest hygiene standards. Gentle, long-waved ceramic infrared warmth is an invitation to dream and relax.**

Lounger One Plus convinces with ergonomically shaped large-scale Heat Storing Ceramics that ensure an excellent lying comfort. Delicate curves and an organically inspired design provide dynamic, smooth aesthetics. Gentle ceramic radiant heat in the health enhancing infrared range has a soothing effect on the body and mind via the autonomic nervous system – vitality and vigor complete the innovative design.

An infinitely variable temperature controller allows for a recommended surface temperature of ~ 34°C. The velvety-soft, ceramic surface and only two transverse joints make the Lounger One Plus easy to clean. Thus, it meets highest hygiene requirements in a private as well as public space. Optional features ideally match the heated lounger to its environment. An USB port charges work and reading devices. The corpus body and the headrest can be color-coordinated with the glaze.

The electrically heated ceramic surface is available in 15 different glazes. This heated lounger is maintenance-free and can be easily cleaned using a soft cloth.
